PROTECT

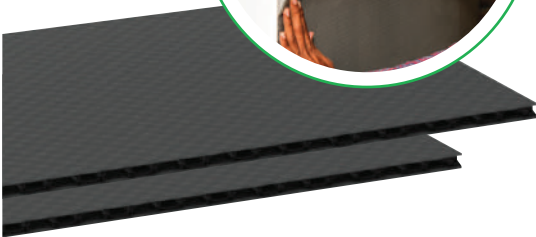

Floor Protect | Wood Protect

AeroPro FLOOR PROTECT

AeroPro Floor Protect is a lightweight, impact-resistant honeycomb polypropylene sheet that safeguards floors, walls, and surfaces from damage during construction and renovation.

AeroPro WOOD PROTECT

AeroPro Wood Protect is an affordable surface protection sheet that shields wooden furniture, partitions, and laminates from moisture, damage, pests, and fungal attacks.

Usage and Application Guide

AeroPro Floor Protect

1. Measure the floor area, lay and cut AeroFloorProtect sheets to fit.
2. Seal edges and joints with tape to protect the surface.
3. After work, remove sheets for reuse or recycle locally.

AeroPro Wood Protect

1. Measure your wooden item and cut AeroPro Wood Protect to size.
2. Apply adhesive (3M-SG1000 or PIDILITE SP-5) to the wood and the sheet.
3. Press the sheet firmly onto the surface for 5–10 minutes, then reposition your furniture.
